Subject index

Absorbance
Calculation of the absorbance by integration of the concentration distribution in long optical path length thin layer electrochemical cells (Heering, Hagen) 235

a.c. impedance spectroscopy
The effect of $[K^+]$ on the heterogeneous rate constant for the $[Fe(CN)_6]^{3-}/[Fe(CN)_6]^{4-}$ redox couple investigated by a.c. impedance spectroscopy (Campbell, Peter) 257

Amperometry
Micro-hole interface for the amperometric determination of ionic species in aqueous solutions (Osborne et al.) 155

Benzene oxidation
Redox capacity of polyparaphenylene (PPP) films prepared by benzene oxidation on Pt in strongly acidic SO_2 solutions at low temperature (Hara et al.) 223

Bilayer polymers
Electrochemical study of bilayer conducting polymers: polypyrrole/polyaniline system (Gao et al.) 127

Biosensors
Electron transfer on an electrode of glucose oxidase immobilized in polyaniline (Lu et al.) 31

Carbon monoxide
Investigations of coadsorption of carbon monoxide with S or Bi adatoms at a platinum electrode by in-situ FTIR spectroscopy and quantum chemistry analysis (Lin et al.) 1

Carbon paste electrodes
Cyclic voltammetric behavior of certain copper–azole systems using carbon paste electrodes (Lakshminarayanan et al.) 79

Catalytic transimination
An electrochemical contribution to the study of catalytic transimination: Schiff base of pyridoxal phosphate with ethylamine and ethylenediamine (Hidalgo et al.) 199

Coadsorption
Investigations of coadsorption of carbon monoxide with S or Bi adatoms at a platinum electrode by in-situ FTIR spectroscopy and quantum chemistry analysis (Lin et al.) 1

Complexes
Electrochemical behaviour and polymerization of rhodium (III) complexes with tertiary phosphines and nitrogen ligands (Bettega, Moutet) 271

Conducting polymers
Electrochemical study of bilayer conducting polymers: polypyrrole/polyaniline system (Gao et al.) 127

Conductive polymers
Electrochemical separation of ionic compounds using a conductive stationary phase coated with polyaniline or polypyrrole film, and ion exchange properties of conductive polymers (Nagaoka et al.) 179

Convolution
Mass transfer and convolution. Part 1. Theory (Vieil) 9

Copper–azole systems
Cyclic voltammetric behavior of certain copper–azole systems using carbon paste electrodes (Lakshminarayanan et al.) 79

Corrosion inhibitions
Cyclic voltammetric behavior of certain copper–azole systems using carbon paste electrodes (Lakshminarayanan et al.) 79

Cyclic voltammetry
Cyclic voltammetric behavior of certain copper–azole systems using carbon paste electrodes (Lakshminarayanan et al.) 79
Kinetics of dissociation of copper(II)–proline complex by cyclic voltammetry with a Nafion®-coated electrode (Correia dos Santos et al.) 171
The cyclic voltammetry of some metallophthalocyanines with sulphonated 17-membered diazatrioxamacrocycles in dimethylsulphoxide and in water (Tan et al.) 251

Cytochrome c_3
Separation of superimposed electroreflectance signals by a phase-shift technique: separation of ER signal of cytochrome c_3 adsorbed on the electrode surface from that of methylviologen in a solution phase (Sagara et al.) 285

Diazatrioxamacrocycles
The cyclic voltammetry of some metallophthalocyanines with sulphonated 17-membered diazatrioxamacrocycles in dimethylsulphoxide and in water (Tan et al.) 251

Differential pulse polarography
Contribution to the study of differential pulse polarography in the case of quasi-reversible and irreversible simple reactions (Fatouros et al.) 135
Analytical performance of differential pulse polarography in the case of non-reversible simple reactions (Krulic et al.) 143

Dropping mercury microelectrode
Application of the dropping mercury microelectrode (DMμE) in electrode kinetics and electroanalysis (Baars et al.) 189

Electrical double layer
The electrical double layer at the interface between mercury and a polyether electrolyte. Part 1: Tetraethylene glycol dimethyl ether solutions (Bruce et al.) 163

Electroactive polymer coated electrodes
Modelling the impedance properties of electrodes coated with electroactive polymer films (Vorotyntsev et al.) 37

Electroanalysis
Application of the dropping mercury microelectrode (DMμE) in electrode kinetics and electroanalysis (Baars et al.) 189

Electrocatalysis
Investigations of coadsorption of carbon monoxide with S or Bi adatoms at a platinum electrode by in-situ FTIR spectroscopy and quantum chemistry analysis (Lin et al.) 1

Electrocatalytic oxidation
Electrocatalytic oxidation of methanol on a glassy carbon electrode modified by nickel hydroxide formed by ex situ chemical precipitation (Taraszewska, Rosłonek) 209

Electrochemical reduction
Electrochemical reduction of sulphur dioxide from molten amides at glassy carbon electrodes (Mathew, Narayan) 215
Electrochemical regeneration
Electrochemical regeneration of clean and ordered Pd(100) surfaces by iodine adsorption–desorption: evidence from low-energy electron diffraction (Schimpf et al.) 247
Electrochemical separation
Electrochemical separation of ionic compounds using a conductive stationary phase coated with polyaniline or polypyrrole film, and ion exchange properties of conductive polymers (Nagaoka et al.) 179
Electrochemical systems
General problem of limiting diffusion–migration currents in a system with ions of three arbitrary charge numbers (Sokirko) 51
Electrode kinetics
Application of the dropping mercury microelectrode (DMμE) in electrode kinetics and electroanalysis (Baars et al.) 189
Electron transfer
Electron transfer on an electrode of glucose oxidase immobilized in polyaniline (Lu et al.) 31
Electropolymerization
Low potential electropolymerization of thiophene in aqueous perchloric acid (Bazzaoui et al.) 63
Electroreflectance
Separation of superimposed electroreflectance signals by a phase-shift technique: separation of ER signal of cytochrome c_3 adsorbed on the electrode surface from that of methylviologen in a solution phase (Sagara et al.) 285
Enzymatic redox–reactions
A potentiostatic multi-pulse method using redox polymers for potentiometric measurements of enzymatic redox–reactions (Vering et al.) 277
Ethylamine
An electrochemical contribution to the study of catalytic transimination: Schiff base of pyridoxal phosphate with ethylamine and ethylenediamine (Hidalgo et al.) 199
Ethylenediamine
An electrochemical contribution to the study of catalytic transimination: Schiff base of pyridoxal phosphate with ethylamine and ethylenediamine (Hidalgo et al.) 199

Fick's law
Mass transfer and convolution. Part 1. Theory (Vieil) 9
Flavin adenine dinucleotide
Molecular resolution imaging of flavin adenine dinucleotide adsorbed on highly oriented pyrolytic graphite by scanning tunnelling microscopy (Wang et al.) 261
FTIR spectroscopy
Investigations of coadsorption of carbon monoxide with S or Bi adatoms at a platinum electrode by in-situ FTIR spectroscopy and quantum chemistry analysis (Lin et al.) 1

Glassy carbon electrode
Electrocatalytic oxidation of methanol on a glassy carbon electrode modified by nickel hydroxide formed by ex situ chemical precipitation (Taraszewska, Rosłonek) 209
Glassy carbon electrodes
In situ IR spectroscopic characterization of surface oxide species on glassy carbon electrodes (Yang, Lin) 23
Electrochemical reduction of sulphur dioxide from molten amides at glassy carbon electrodes (Mathew, Narayan) 215
Glucose oxidase
Electron transfer on an electrode of glucose oxidase immobilized in polyaniline (Lu et al.) 31
Glucose sensor
Properties of porous activated carbon electrode materials used as sensors for glucose (Armstrong, Newton) 87

Hanging mercury drop electrode
Kinetics of dissociation of copper(II)–proline complex by cyclic voltammetry with a Nafion®-coated electrode (Correia dos Santos et al.) 171
Heterogeneous rate constant
The effect of $[K^+]$ on the heterogeneous rate constant for the $[Fe(CN)_6]^{3-}/[Fe(CN)_6]^{4-}$ redox couple investigated by a.c. impedance spectroscopy (Campbell, Peter) 257
Heteropolymolybdate anions
A voltammetric study of Keggin-type heteropolymolybdate anions (Maeda et al.) 149
Hexacyanoferrate redox couple
The effect of $[K^+]$ on the heterogeneous rate constant for the $[Fe(CN)_6]^{3-}/[Fe(CN)_6]^{4-}$ redox couple investigated by a.c. impedance spectroscopy (Campbell, Peter) 257

Impedance
Impedance of rough capacitive electrodes (Pajkossy) 111
Impedance characteristics
Impedance characteristics of conducting polythiophene films (Johnson et al.) 103
Impedance modelling
Modelling the impedance properties of electrodes coated with electroactive polymer films (Vorotyntsev et al.) 37
Iodine adsorption–desorption
Electrochemical regeneration of clean and ordered Pd(100) surfaces by iodine adsorption–desorption: evidence from low-energy electron diffraction (Schimpf et al.) 247
IR spectroscopy
In situ IR spectroscopic characterization of surface oxide species on glassy carbon electrodes (Yang, Lin) 23

Keggin anions
A voltammetric study of Keggin-type heteropolymolybdate anions (Maeda et al.) 149

Limiting diffusion–migration currents
General problem of limiting diffusion–migration currents in a system with ions of three arbitrary charge numbers (Sokirko) 51
Long optical path length electrochemical cells
Calculation of the absorbance by integration of the concentration distribution in long optical path length thin layer electrochemical cells (Heering, Hagen) 235
Low-energy electron diffraction
Electrochemical regeneration of clean and ordered Pd(100) surfaces by iodine adsorption–desorption: evidence from low-energy electron diffraction (Schimpf et al.) 247

Mass transfer processes
Mass transfer and convolution. Part 1. Theory (Vieil) 9
Mathematical modelling
Mass transfer and convolution. Part 1. Theory (Vieil) 9
Mathematical models
General problem of limiting diffusion–migration currents in a system with ions of three arbitrary charge numbers (Sokirko) 51
Mercury polyether
The electrical double layer at the interface between mercury and a polyether electrolyte. Part 1: Tetraethylene glycol dimethyl ether solutions (Bruce et al.) 163

Metallophthalocyanines
The cyclic voltammetry of some metallophthalocyanines with sulphonated 17-membered diazatrioxamacrocycles in dimethylsulphoxide and in water (Tan et al.) 251
Methanol
Electrocatalytic oxidation of methanol on a glassy carbon electrode modified by nickel hydroxide formed by ex situ chemical precipitation (Taraszewska, Rosłonek) 209
Micro-hole interface
Micro-hole interface for the amperometric determination of ionic species in aqueous solutions (Osborne et al.) 155
Molecular resolution imaging
Molecular resolution imaging of flavin adenine dinucleotide adsorbed on highly oriented pyrolytic graphite by scanning tunnelling microscopy (Wang et al.) 261
Molten amides
Electrochemical reduction of sulphur dioxide from molten amides at glassy carbon electrodes (Mathew, Narayan) 215

Nafion®-coated electrode
Kinetics of dissociation of copper(II)–proline complex by cyclic voltammetry with a Nafion®-coated electrode (Correia dos Santos et al.) 171
NaOD
Comparison of electrochemical behaviour of the Pd–NaOD and Pd–NaOH systems (Kapali et al.) 95
NaOH
Comparison of electrochemical behaviour of the Pd–NaOD and Pd–NaOH systems (Kapali et al.) 95
Nernst–Planck law
Mass transfer and convolution. Part 1. Theory (Vieil) 9
Non-reversible reactions
Analytical performance of differential pulse polarography in the case of non-reversible simple reactions (Krulic et al.) 143

Palladium
Comparison of electrochemical behaviour of the Pd–NaOD and Pd–NaOH systems (Kapali et al.) 95
Phosphines
Electrochemical behaviour and polymerization of rhodium (III) complexes with tertiary phosphines and nitrogen ligands (Bettega, Moutet) 271
Plastocyanin
Direct electrochemistry of parsley plastocyanin on pyrolytic graphite electrodes (Conrad et al.) 17
Platinum electrode
The effect of zinc ions on the platinum electrode in alkaline solutions (Dorda et al.) 71
Polarography
Method-independent representation of polarographic and voltammetric measurement results of reversible redox couples (Pajkossy) 229
Polyanaline
Electrochemical study of bilayer conducting polymers: polypyrrole/polyaniline system (Gao et al.) 127
Polyaniline
Electron transfer on an electrode of glucose oxidase immobilized in polyaniline (Lu et al.) 31
Electrochemical separation of ionic compounds using a conductive stationary phase coated with polyaniline or polypyrrole film, and ion exchange properties of conductive polymers (Nagaoka et al.) 179
Polymerization
Electrochemical behaviour and polymerization of rhodium (III) complexes with tertiary phosphines and nitrogen ligands (Bettega, Moutet) 271
Polyparaphenylene
Redox capacity of polyparaphenylene (PPP) films prepared by benzene oxidation on Pt in strongly acidic SO_2 solutions at low temperature (Hara et al.) 223
Polypyrrole
Electrochemical study of bilayer conducting polymers: polypyrrole/polyaniline system (Gao et al.) 127
Electrochemical separation of ionic compounds using a conductive stationary phase coated with polyaniline or polypyrrole film, and ion exchange properties of conductive polymers (Nagaoka et al.) 179
Polythiophene
Impedance characteristics of conducting polythiophene films (Johnson et al.) 103
Porous activated carbon electrode
Properties of porous activated carbon electrode materials used as sensors for glucose (Armstrong, Newton) 87
Potentiometric measurements
A potentiostatic multi-pulse method using redox polymers for potentiometric measurements of enzymatic redox–reactions (Vering et al.) 277
Pyridoxal phosphate
An electrochemical contribution to the study of catalytic transimination: Schiff base of pyridoxal phosphate with ethylamine and ethylenediamine (Hidalgo et al.) 199
Pyrolytic graphite electrode
Direct electrochemistry of parsley plastocyanin on pyrolytic graphite electrodes (Conrad et al.) 17

Quantum chemistry analysis
Investigations of coadsorption of carbon monoxide with S or Bi adatoms at a platinum electrode by in-situ FTIR spectroscopy and quantum chemistry analysis (Lin et al.) 1

Redox capacity
Redox capacity of polyparaphenylene (PPP) films prepared by benzene oxidation on Pt in strongly acidic SO_2 solutions at low temperature (Hara et al.) 223
Redox polymers
A potentiostatic multi-pulse method using redox polymers for potentiometric measurements of enzymatic redox–reactions (Vering et al.) 277
Reversible redox couples
Method-independent representation of polarographic and voltammetric measurement results of reversible redox couples (Pajkossy) 229
Rhodium (III)
Electrochemical behaviour and polymerization of rhodium (III) complexes with tertiary phosphines and nitrogen ligands (Bettega, Moutet) 271
Rough capacitive electrodes
Impedance of rough capacitive electrodes (Pajkossy) 111

Scanning tunnelling microscopy
Molecular resolution imaging of flavin adenine dinucleotide adsorbed on highly oriented pyrolytic graphite by scanning tunnelling microscopy (Wang et al.) 261
Schiff base
An electrochemical contribution to the study of catalytic transimination: Schiff base of pyridoxal phosphate with ethylamine and ethylenediamine (Hidalgo et al.) 199

Simple reactions
Contribution to the study of differential pulse polarography in the case of quasi-reversible and irreversible simple reactions (Fatouros et al.) 135
Solid electrolytes
Investigation of sulphur/sulphide redox couple at glassy carbon/solid electrolyte $0.7AgI + 0.3Sb_2S_3$ (Mentus) 241
Sulphur dioxide
Electrochemical reduction of sulphur dioxide from molten amides at glassy carbon electrodes (Mathew, Narayan) 215
Surface oxide species
In situ IR spectroscopic characterization of surface oxide species on glassy carbon electrodes (Yang, Lin) 23
Surface structure
Investigations of coadsorption of carbon monoxide with S or Bi adatoms at a platinum electrode by in-situ FTIR spectroscopy and quantum chemistry analysis (Lin et al.) 1

Tetraethylene glycol dimethyl ether
The electrical double layer at the interface between mercury and a polyether electrolyte. Part 1: Tetraethylene glycol dimethyl ether solutions (Bruce et al.) 163

Thiophene
Low potential electropolymerization of thiophene in aqueous perchloric acid (Bazzaoui et al.) 63
Transport processes
General problem of limiting diffusion–migration currents in a system with ions of three arbitrary charge numbers (Sokirko) 51

Voltammetry
Method-independent representation of polarographic and voltammetric measurement results of reversible redox couples (Pajkossy) 229

Zinc
The effect of zinc ions on the platinum electrode in alkaline solutions (Dorda et al.) 71
